

PHANPHUM PRATHUMSUWAN

Chatuchak, Bangkok, Thailand | +66 80 595 2200 | phanphump2004@gmail.com | [Portfolio](#) | [LinkedIn](#)

EDUCATION

Mahidol University, Faculty of ICT — B.Sc. Software Engineering	Aug 2022 – May 2026
---	---------------------

EXPERIENCE

Full-Stack Developer — <i>DormiSpace: Dormitory Management Platform</i>	Aug 2025 – Apr 2026
- Designed and implemented 38 RESTful API endpoints and 12 normalized PostgreSQL tables for contracts, billing, utility tracking, RBAC, Omise Payment, and Google Cloud Vision OCR. - Led Flutter frontend development by translating specifications into reusable UI components, while supporting CI/CD workflows and production-level issue resolution.	
Research Intern at ReaLearn Laboratory — <i>Tohoku University, Japan</i>	May 2025 – Aug 2025
- Built an automated Python benchmarking framework to evaluate reliability and failure behavior across 7 LLMs through repeatable test workflows. - Analyzed model outputs to identify failure patterns, reliability gaps, and evaluation coverage improvements for AI systems.	
Research Intern at Ishii Laboratory — <i>JAIST, Japan</i>	Jun 2024 – Aug 2024
- Conducted formal verification case studies on embedded system models using Lustre/Kind2 and Simulink/SLDV. - Evaluated tool expressiveness, correctness coverage, and performance limitations, producing structured recommendations for technical and non-technical stakeholders.	

PROJECTS

JavaFlame Test Suites
Extended an open-source Java flame graph debugger (92 ★) with 10 test suites using formal input domain modelling, personally owning 2 suites and applying ACoC and PWC coverage strategies across five white-box testing approaches
GoodPoliz: AI-Assisted Police Operations System
Owned end-to-end testing for a multi-stakeholder operations management system: Flutter UI workflows, backend unit tests (JUnit + Mockito), and manual system testing with requirement traceability matrix.
Gemini Telescope Control System
Designed and implemented a web-based control system bridging modern RESTful APIs with a legacy control system via UML-modelled architecture, enabling seamless communication across new and existing components.
Online Tutor Search and Management Website
- Designed and implemented backend logic and relational database schemas (SQL) for managing profiles and booking workflows. - Optimized query performance and matching algorithms to improve system efficiency and response time.

ACTIVITY

Participant in Mahidol AI Hackathon 2 — <i>Faculty of Information and Communication Technology</i>
- Collaborated in a cross-functional team to design and implement an AI-based solution for addressing healthcare service challenges. - Managed data preparation and model integration, ensuring smooth interaction between data pipelines and application logic.

CERTIFICATIONS

Google Data Analytics — Google / Coursera, Apr 2023 Using Python to Interact with the Operating System — Google / Coursera, Oct 2024
--

SKILLS & LANGUAGES

Programming: Java, Python, Dart, JavaScript, SQL, R Backend & Database: Spring Boot, RESTful API, PostgreSQL, MySQL, Firebase, Linux Frontend & Mobile: Flutter, HTML/CSS Testing & DevOps: JUnit, Mockito, Postman, Robot Framework, JMeter, AWS, GitHub Actions, Docker Data: Pandas, ETL concepts, Google Data Analytics Languages: Thai (Native), English (IELTS 7.0, TOEIC 895), Japanese (JLPT N5)
--
