

PHANPHUM PRATHUMSUWAN

Chatuchak, Bangkok, Thailand | +66 80 595 2200 | phanphump2004@gmail.com | [Portfolio](#) | [LinkedIn](#)

EDUCATION

Mahidol University, Faculty of Information and Communication Technology (ICT),
Bachelor of Science in Software Engineering

Aug 2022 – May 2026

EXPERIENCE

Full-Stack Developer for DormiSpace: Dormitory Management Platform

Aug 2025 – Apr 2026

- Designed scalable RESTful APIs for contract lifecycle management, multi-tenant billing, and inventory tracking — processes directly analogous to SAP MM workflows — with secure role-based access control and optimized PostgreSQL schemas.
- Led Flutter frontend development translating UI/UX requirements into maintainable screens and reusable components, while maintaining GitHub Actions CI/CD pipelines and diagnosing production-level issues across API responses and system reliability.

Research Intern at ReaLearn Laboratory — Tohoku University, Japan

May 2025 – Aug 2025

- Designed and implemented an automated benchmarking framework to evaluate reliability and failure behavior across seven LLMs, improving evaluation coverage and support for robust AI deployment.
- Analyzed model outputs to identify failure patterns and reliability gaps, producing insights that informed more stable AI system behavior.

Research Intern at Ishii Laboratory — Japan Advanced Institute of Science and Technology (JAIST), Japan

Jun 2024 – Aug 2024

- Applied formal verification techniques to analyze system correctness and safety properties, translating system specifications across platforms and producing technical documentation to support design decisions.

PROJECTS

GoodPoliz: AI-Assisted Police Operations System

- Owned end-to-end testing for a police operations management system, covering Flutter UI workflows, backend unit tests (JUnit + Mockito), and manual system testing with a requirement traceability matrix to verify functional coverage.

Gemini Telescope Control System

- Designed and implemented a web-based control system bridging modern RESTful APIs with a legacy Observatory Control System via UML-modelled architecture, enabling seamless communication between new and existing components.

Online Tutor Search and Management Website

- Designed and implemented backend logic and relational database schemas (SQL) for managing tutor profiles and booking workflows
- Optimized query performance and matching algorithms to improve system efficiency and response time

ACTIVITY

Participant in Mahidol AI Hackathon 2 — Faculty of Information and Communication Technology

- Collaborated in a cross-functional team to design and implement an AI-based solution for addressing healthcare service challenges
- Managed data preparation and model integration, ensuring smooth interaction between data pipelines and application logic

CERTIFICATIONS

- SAP Professional Fundamentals** — SAP / Coursera, May 2026
- Google Data Analytics** — Google / Coursera, Apr 2023
- Using Python to Interact with the Operating System** — Google / Coursera, Oct 2024

SKILLS & LANGUAGES

Programming: C, Java, Python, Dart, JavaScript, SQL

Backend & Database: Spring Boot, RESTful API Design, PostgreSQL, MySQL, Firebase

Cloud & DevOps: AWS, GitHub Actions, Docker

Testing: JUnit, Mockito, Robot Framework, JMeter

Systems & Reliability: Linux, application monitoring, incident troubleshooting, root cause analysis

ERP & Configuration: SAP Professional Fundamentals, Configuration Management

Languages: Thai (Native), English (IELTS 7.0, TOEIC 895), Japanese (JLPT N5)
